About CookieMetrix

The results presented might not be 100% correct. This tool is meant to be used by site owners as a starting point for improvements, not as a rigorous analysis.

This tool attempts to simulate what happens when a user visits a specified page with a typical browser. The browser has no addons/extensions installed, and Do Not Track (DNT) is not enabled, since this is the default setting in most browsers. External files such as images, scripts and CSS are loaded, but the tool performs no interactions with the page - no links are clicked, no forms are submitted.

About CookieLaw

All sites that install cookies must show a banner to the user's first visit, put in place a cookie policy and allow the user to provide consent as indicated by law. Before consent is given, no cookie, except technical cookies, can be installed.

Violators face a fine of up to 120.000 Euros

About the Developer

CookieMetrix was developed by [SqueezeMind](#) as a tool to easily determine the compliant of websites to EU legislation on cookies.
